

DAYVILLE FIRE COMPANY
STANDARD OPERATING GUIDELINES

Section: Apparatus

Date Issued: 1-30-95

SOG: C-5

SUBJECT: FUELING OF APPARATUS

PURPOSE: To describe the department policy on fueling of apparatus

DEFINITION:

This guideline is provided to establish where and how the apparatus will be fueled and/or refueled.

At any time when the fire apparatus being driven has less than 3/4's of a tank of fuel or at the driver's discretion, it will be taken and filled. Currently, apparatus will be filled at the Town Highway Garage. Each vehicle has a card, which will be used to operate the pump. Ensure that the card is returned to its assigned space on the apparatus. In the event the pumps at the garage are not working the driver will obtain a credit card from one of the Chief's to fuel the apparatus. Upon returning to the station the credit card will be returned with the slip.
